

In late October 2015, the trail system at Highland Springs Recreation Area was closed per Lake County Water Resources due to winter weather conditions but there were no signs posted and people continued to use the trail system. Signs were not posted until December. Deterioration of trails occurred.

Mark Miller is our new contact for the County. Mark Miller's contact information is mark-miller@lakecountyca.gov 707-263-2344 or cell 707-272-0769 It appears he will be more active in helping to address some of these issues. Please contact Mr. Miller with any questions or problems.

Hard surface dirt roads like The Old Toll Road are still available for use during the winter months. Horseback riding and driving in those areas is acceptable, however, be cautious as many turnouts for parking are very muddy and soft.
